

I'm a hard worker, disciplined, patient and I have great experience in working on a team while also being able to work on my own initiative. I'm looking for the chance to interview for a Graduate Software Developer position starting June 2023. Every one of the jobs I have held have required an aptitude for troubleshooting, problem diagnosis and solving. I have been working evenings and weekends while in college in order to fund my education as I do not receive a grant. I'm incredibly punctual and take great pride in my work, which has required an obsession for detail and initiative in reaching and surpassing targets.

Education:

- BSc (Hons) in Software Design with Cloud Computing at T.U.S (September 2022 – Present)
- BSc in Software Design with Cloud Computing at T.U.S (September 2021 – May 2022)
- Higher Cert in Software Design at A.I.T, **GPA 78.75%** (September 2019 – May 2021)
- Leaving Cert at St. Killians V.S New Inn, **390 points** (September 2008 – May 2013)

3rd Year – Stage GPA 72.5%

Module	Grade	Module	Grade
Software Development (Java)	94	Software Engineering	76
Software Development (C#)	51	Web Development 3	50
Ops Systems & Concurrency	76	Server-side Web Development	88

2nd Year – Stage GPA 82.16%

Module	Grade	Module	Grade
Software Development (Java)	74	Software Dev for Cloud (C#)	83
Agile Methodologies	89	Networks	89
Maths for Software Design	78	Web Development 2.2	87
Web Development 2.1	79	Group Project	89
Mobile Applications	95	Databases	71

Group Project - [Newspaper Delivery System](#)

We were tasked with developing an application for a Newsagent which would handle a range of different elements from orders to automatically generating invoices and more. I was mainly responsible for the Order and OrderGUI branches and I also held the role of scrum master for the final sprint.

Individual Project – [Weather API](#)

For this project I had to pull information from openweathermap API key and then display the data on a webpage. Weather can be obtained for a location by a searchbox and also by using your location.

Employment History:

Ericsson, Athlone, Co. Westmeath

Co-op (June 2021 – August 2021 & January 2022 – September 2022)

- Worked on a team dealing with Event Based Statistics.
- Wrote up several confluence pages for new starters to aid initial setup.
- Testing the results of new deployments on vApps before sending them live.
- Over the course of my co-op I gained experience with the following: Git, Gerrit, Jenkins, Jira, TAF, Maven, Groovy Testing, MobaXterm.
- I also gained a wealth of experience in the Agile process, sprint planning, retrospective meetings, daily stand ups, design analysis, pair programming.

Arrabawn Dairies, Kilconnell, Ballinasloe, County Galway**Productions Operator (May 2012 - May, 2014)**

- Responsible for ensuring the smooth production of dairy products on a day-to-day basis while also diagnosing and fixing issues with the machines.
- Ensuring machinery ran efficiently with a fluctuating daily quota that needed to be hit within a high-pressure, fast paced working environment.
- Maintaining a high quality of cleanliness in the work environment.

Interests & Achievements:

- P.A.S.S Leader (Peer Assisted Student Support) in Year 2 to aid incoming first years and help them get their bearings.
- Class rep since Year 1 for my class group and have been quite vocal on several issues.
- Moderator for a Facebook group containing over 78,000 people mainly dealing with complaints and quality assurance, new member approvals and monitoring content.
- I love motorbikes and cars, I currently own 2 motorbikes and a car and have full clean licenses for both.
- Previous to returning to college I spent time volunteering with the G.S.P.C.A helping with cleaning duties, dog walking, capturing stray dogs and other odd jobs at the sanctuary.
- I thoroughly enjoy maths, having been recognised for Excellence in Mathematics twice in Secondary School, in fourth year and in my Leaving Certificate year 2013.
- I have had a huge interest in anything tech related from an early age.
